WJ PRATT

COMPANY PROFILE

'next generation water solutions'

Capability Statement

Our company has proven itself in Australia over the last 45 years. We have successfully completed many major projects such as Melbourne Sports and Aquatic Centre Stage 1 and 2, Upgrades at Homebush Aquatic Centre and the FINA 2007 World Championship pools.

We offer full design and construct services for water treatment, hydraulic services and environmental initiatives.

Our company has full off site manufacturing facilities and in house engineering capabilities and offer our services to all geographical locations in the Australasian and Pacific Regions.

We are completely focussed on client satisfaction and would appreciate the opportunity to demonstrate our capability first hand.

We believe that our market advantage is the turnkey operation we provide and the level of experience we bring to projects. The majority of our works is based on consultant or client recommendations as we have never been subjected to liquidated damages not have we ever had a project where the pool water treatment has failed.

We utilise qualified tradesman rather than fitters and have our own in-house controls development and control panel manufacture business. It is clear that when a client just wants a pool that works and is built on time with the necessary quality then we are the contractor of choice.

Our experience with large scale pool water treatment systems is unrivalled in Australia and we believe that we provide our clients with the assistance and experience to ensure project we work on are a complete success. We never forget the saying "You are only as good as your least project".

We have no supplier agreements and this allows to consider products that best suit a clients needs rather than putting forward products simply because we are an agent of the manufacturer.

Please feel free to contact us for any further information in regards to ability, quality, experience or technical capability.

Brief Overview

In 1967 Walter J. Pratt Pty Ltd. commenced operations in Melbourne, Australia providing commercial plumbing services to the construction industry. Since then we have expanded our operations providing services in the fields of water treatment and environmental services.

Our client base consists of major builders, developers, project managers, consultants, manufacturing companies and government organisations. We are capable of delivering design only or design and construction services on local, interstate and international projects.

Walter J. Pratt Pty. Ltd. currently employs a workforce of approximately 30 staff throughout Australia. Our staff includes site personnel, technicians, supervisors, contract administrators, design and documentation team, pre-fabrication and support staff.

In the following sections we aim to demonstrate our capability and experience to our potential clients, including a list of completed projects, current projects and specific services within the fields of:

- WATER TREATMENT – Aquatic Centres and Exhibits
- WATER RECYCLING - Stormwater, Rainwater & Backwash Water Recovery
- POWER REDUCTIONS – VFD/VSD installations, PLC Changes and solar heating

Water Treatment

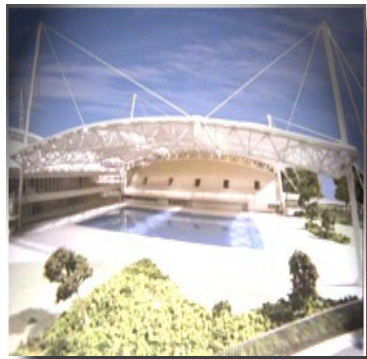

At Walter J. Pratt Pty. Ltd, we have developed an integrated approach to provide clean and clear water using innovative-engineered solutions. Our design philosophy is to provide a treatment system that is cost effective, water efficient, easy to operate and low in maintenance and power consumption.

Melbourne Sports and Aquatic Centre

Walter J Pratt Pty Ltd have designed and constructed the water treatment system for Melbourne Sports and Aquatic Centre.

This is our most significant pool water treatment project. The pool consists of an 80 metre competition/diving pool with movable floor, 25 metre lap pool, and hydrotherapy pool with movable floor, leisure pool with wave machine and two spa pools. The treatment system uses processes including, Filtration, ozone generation, activated carbon filtration and chlorine disinfection. The project spanned over 18 months to deliver clean and clear water to the international competition pool.

Melbourne Sports and Aquatic Centre, Stage 2

Melbourne Sports and Aquatic Centre (MSAC) was the home for the 2006 Commonwealth Games water sports competitions. WJP will provide water treatment for a 50m FINA compliant pool and hydrotherapy pool. This pool was also used for the FINA World Championships 2007.

In 2011 we continue to service this client through the upgrade of the Ozone System and the construction of the Flowrider Feature

Completed Projects

Mountfort Park Aquatic Centre (NZ)

Mountfort Park Aquatic Centre (NZ) - boasts a new 25m FINA compliant pool, a new toddler splash pool, a new learn to swim pool, a new spa, less noise to acoustic separation of pools, and better water quality with fewer chemicals. The treatment process includes Ultra Fine Filtration (UFF), chlorine dosing with Building Management System control functions.

Casey Aquatic Centre

Victoria's second largest aquatic centre comprises of a 50-metre competition pool, a wave pool, a program pool, a toddler's pool and a spa pool. WJP provided a combination sand filtration (large pool)/Ultra Fine Filtration (small pool) system for the complex.

FINA World Championships 2007 Pool construction & Water treatment –

Pool construction & Water treatment – Construction of the world's largest ever modular pool (main competition pool), as well as construction of the warm up pool and water treatment to both. Constructed at Melbourne Park Tennis Centre, in Rod Laver Arena and on the indoor courts.

Taronga Zoo

Australia Coastline Precinct – exhibits
For the display of seals, seal lions and penguins, the project includes 7 No. life support systems each including ozone generators, protein skimmers, sand filtration and various water features.

These exhibits have won many national tourism awards.

Maribyrnong Aquatic Centre

Maribyrnong Aquatic Centre -, features an indoor 50m lap pool with moveable boom, leisure pool, program pool and spa.

This project consists of sand filtration, UV steralisation and sodium hypochlorite dosing.

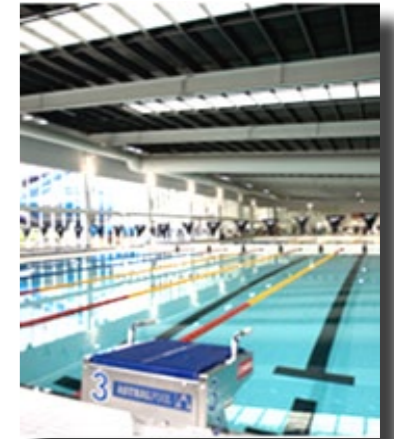

Melbourne Zoo - Wild Seas Exhibit

Melbourne Zoo's biggest ever exhibit is now open. The \$20 million Wild Sea exhibit features the wonders of Victoria's coast and ocean.

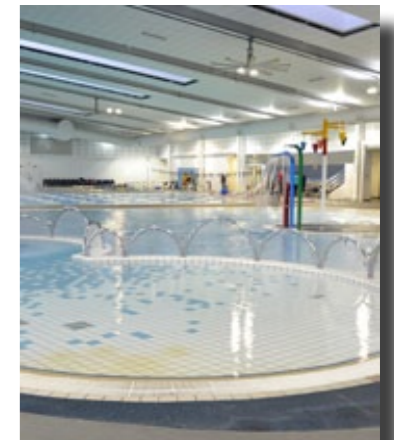

Geelong Leisurelink

WJ Pratt Pty Ltd performed all water treatment, pool hydraulics and building hydraulics on this project. The environmental initiatives installed were rainwater harvesting, Backwash recovery, greywater system, VSD on water slides in the wintergarden.

Casey R.A.C.E (Cranbourne)

Casey R.A.C.E. was completed in June 2009. It is first centre where Walter J Pratt Pty Ltd were able to design and construct an integrated water management system. Casey R.A.C.E is the second largest aquatic centre in Victoria.

Camden (NSW)

Croydon

Listing of other completed Projects

- National Gallery of Victoria - Water feature
- Tattersalls Club (NSW) - Pool water treatment
- Riverton Leisureplex(WA) - Pool water treatment
- Crown Promenade Hotel - Pool water treatment
- Richmond Football Club - Pool water treatment
- Collingwood Football Club - Pool water treatment
- Melville Aquatic Centre (WA) - Pool water treatment
- Esperance Aquatic Centre (WA) - Pool water treatment
- Burswood Casino (WA) - Water feature treatment
- Shenzen China - Dive Impactor
- NAB Head Office (SA) - Solar Water Heating
- Croydon Aquatic and Leisure Centre - Pool water treatment
- Altona Leisure Centre - Pool water treatment
- Hepburn Bath House - Pool water treatment
- Cranbourne Aquatic Centre - Pool water treatment, hydraulics, environmental services
- Croydon Aquatic centre - Pool water treatment, environmental services
- Kyneton Aquatic Centre - Pool water treatment
- Knox Leisureworks - Pool water treatment
- RAAF Amberley (Qld) - 50m pool water treatment
- Hamilton Aquatic Centre - Pool water treatment
- Hobart Aquatic Centre (TAS) - Pool water treatment
- Geelong Leisure Link - Pool water treatment, 50m pool construction, backwash recovery system and rainwater harvesting using reverse osmosis..
- St John of God Hospital, Warrnambool - Hydrotherapy pool water treatment.
- St Kilda Football Club - Pool water treatment
- Cambden Aquatic Centre (NSW) - Pool water
- St. Catherines School - Pool water Treatment
- Melbourne Sports FlowRider - Pool and ride
- Glen Eira Aquatic Centre - Pool water treatment
- Royal Childrens Hospital - Hydrotheray pool water treatment
- Greensborough Aquatic Centre - Pool Water treatment
